

## Are you still going to the internet to book your airline reservation?

### **Beware...You are probably overspending!**

And here's why:

- American Airlines pulled all of their fares and schedules off Orbitz's web site.
- Expedia took all American Airlines' fares and schedules off their web site.
- Delta Air Lines took all of their fares and schedules off Kayak and several other web sites.

Consequently, if you are using Orbitz, Expedia or Kayak, you would never know if American or Delta had the best schedule and fare to a specific destination. You would automatically be overspending, and no one would be the wiser. This hopefully temporary dispute between American, Delta and web sites stems from airlines wanting customers to buy direct to reduce their own distribution costs. It is good for the airlines but not good for their customers' convenience, service and expenditures.

Overspending is also the result if you use a single airline web site without comparing to others. You are forced to invest

valuable time searching multiple sites to get an accurate comparison of fares and schedules for every flight, making the booking process much more complex.

**However, Covington Travel, through our global distribution system with "worldwide full content," can compare and reserve all airlines in a matter of seconds, thus saving you time and money.**

We understand that many people like making their own reservations electronically. That's why **Covington also offers our own online booking tools** that enable business travelers to access our inventory base showing "worldwide full content" of fares, inventories and schedules. In this way, you have the independence of electronic self-booking without the risk of spending increased time and cost in your reservation process.

Whether you use self-booking or full service reservations, Covington Travel has the resources to search all airline fares and schedules and can instantly do the comparisons for you. Let us do the work so you can upgrade your reservation experience.
